Sunlight Hours Analysis

An analysis to get the data of sunlight hours for a Lab Building, GSFC, Vadodara, to make sure how much proficient the proposed shed is.

Mamta Shah & Associates
Environmental Analyst
GSFC, Vadodara
2017

As the building is going to be used as a lab, Projection of the shed is 1.2m to get the better shedding and less heat load.

We can clearly see the benefit of the shed in comparison with the adjoining existing building, which is without a shed.
